SPECIAL ATTENTION

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) STORM WATER CONSTRUCTION GENERAL PERMIT REQUIREMENTS

Bidders are advised that 40 CFR Part 122 applies to this project. This provision prohibits point source discharges of storm water associated with construction activity to water bodies of the United States without a National Pollutant Discharge Elimination System (NPDES) storm water construction general permit.

This project is eligible for coverage under the reissued NPDES Storm Water Construction General Permit for Storm Water Discharge from construction sites which was published in the Federal Register Vol. 73, No. 135 on Monday July 14, 2008. Design-Builders shall prepare and submit a copy of the Environmental Protection Agency (EPA), Notice of Intent (NOI) Form 3510-9 at least 7 days prior to commencement of construction on any site which will result in the disturbance of the land.

Other provisions of the General Permit requires a Storm Water Pollution Prevention Plan to be prepared, implemented, kept current, and maintained on the project site along with inspection reports; and when the project site has been finally stabilized and storm water discharges from construction activities have been eliminated, a Notice of Termination (NOT) Form 3510-7 must be prepared and submitted to the Environmental Protection Agency.

NPDES General Guidelines, including an outline for Construction (Storm Water) Pollution Prevention Plan, Notice of Intent and Notice of Termination are available on the internet in the Business Center at www.nhdot.com or through the NHDOT Contracts Office.

An "active status" of the all submitted NOI's is required prior to commencing any work on the project.

On both the Notice of Intent (NOI) and the Notice of Termination (NOT) forms the information relative to the Facility Operator Information shall be that of the prime Contractor.

It is suggested to file NOI and NOT via the EPA website: http://cfpub.epa.gov/npdes/stormwater/enoi.cfm.
